

# Java One 2010

## Java ME for Emerging and Developing Countries

Dr. Christelle Scharff

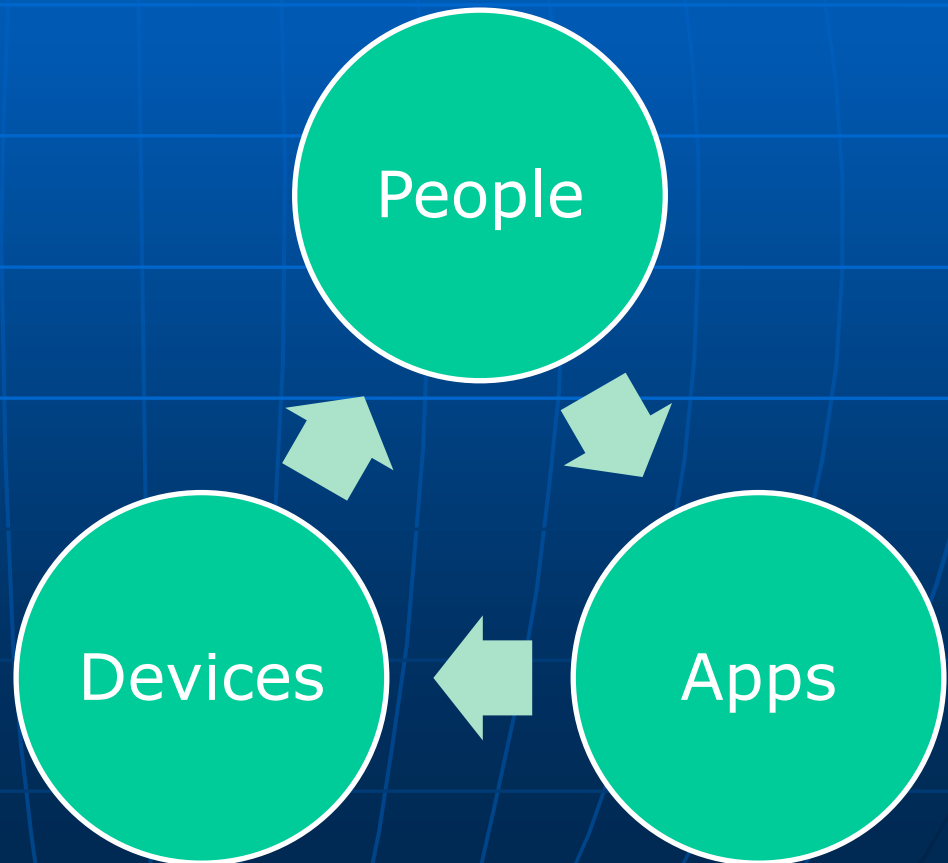

Pace University, NY, USA

<http://www.csis.pace.edu/~scharff>

<http://www.mobilesenegal.com>

# Agenda

- Who am I?
- Why this BOF?
- Audience
- People
- Devices
- Apps

Who am I?

# Why this BOF?

- Generate discussion on this topic and see if more venues are necessary to discuss it
- Have the perspective of a more technical community on the topic
  - There is this type of discussions in venues involving NGOS, international organizations, operators and academia
  - Conferences include: ICT4D, M4D, NSDR, HCI4D, AI4D, Mobileactive conference, Mobile Learning, mHealth summit, UN conferences...

# Questions

- Who are the users?
- How are users manipulating their phones?
- What devices are used?
- What applications are used?
- Is Java ME the dedicated technology for these markets?
- Are industries / developers seeking to understand these markets?
- Who will develop applications for these markets?
- How to train developers worldwide to target these markets?
- What are the specifics of developing mobile applications for these markets?
- What Java ME applications for these markets?
- What are the difficulties in developing / distributing / maintaining mobile applications for these markets?

# Audience

Who are the attendees?

# A Unique Medium – More Than a Computer

- Calls and voice commands

Cheaper?

- Cameras, accelerometers and sensors for proximity and ambient light

- Touch screen

Bridging  
the digital  
divide

- Location by triangulation or GPS

Who are the users?

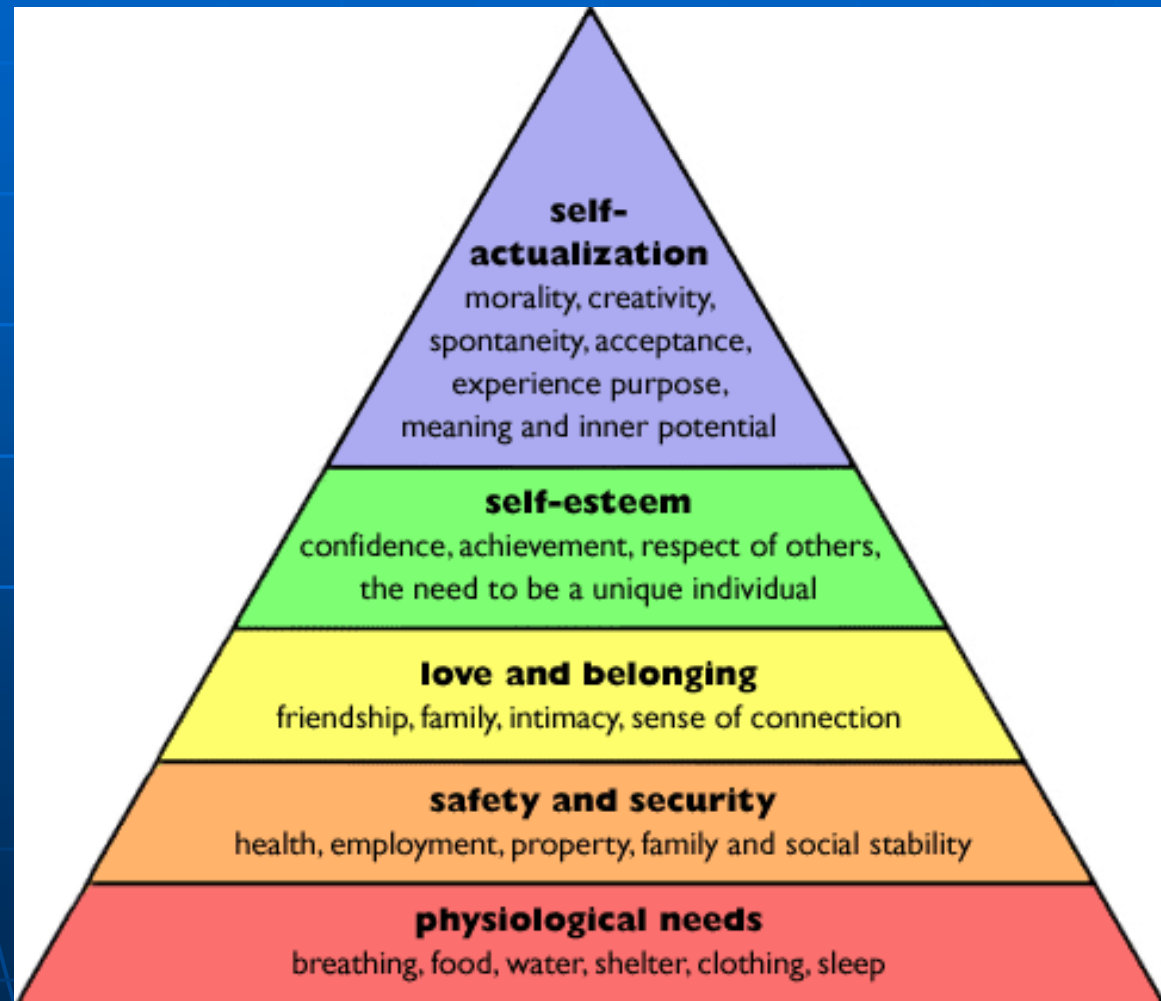

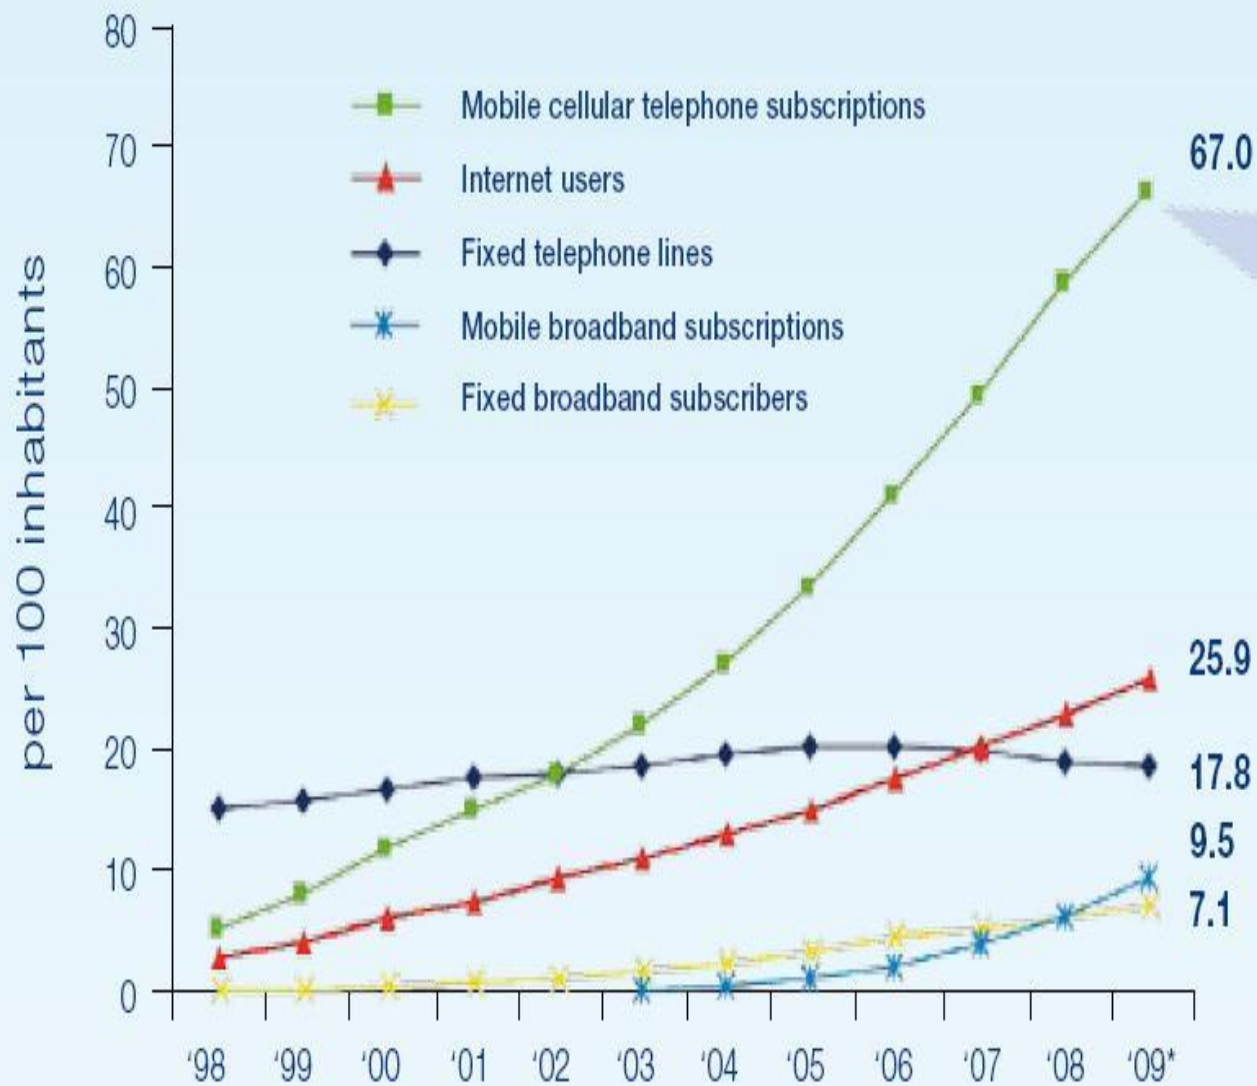

# Mobile Phones and the Maslow's Hierarchy of Needs

Who are the users?

Health,  
educational and  
financial needs

An estimated 4.6 bn subscriptions globally by the end of 2009

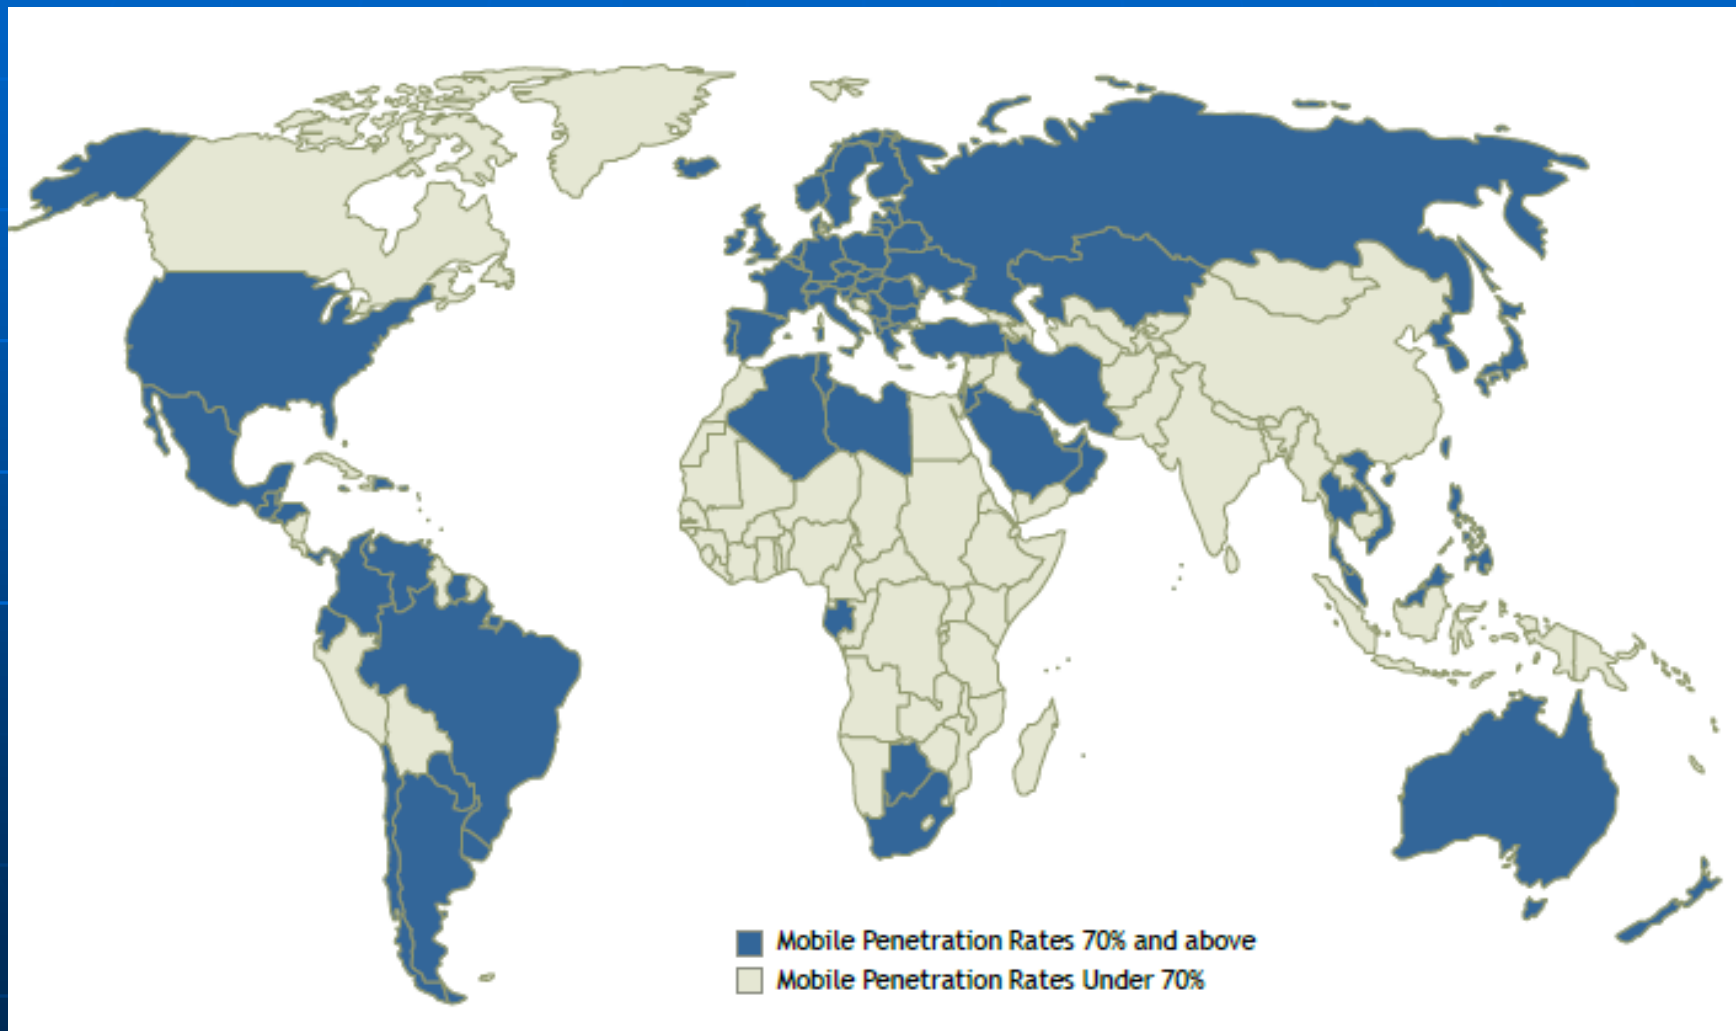

Source: ITU World Telecommunication/ICT Indicators Database.

\* Estimates.

# Specifics of the Emerging / Developing Markets

- Prepaid rather than plans
- Several SIM cards
- Buy phone separate from operator (unlocked phones)
- Dramatically different segments
- 300 million fewer female subscribers than male subscribers in low and middle-income countries [<http://www.vitalwaveconsulting.com>]
- Culture specifics
- Spoken languages versus local languages
- Literacy level
- Requirements for training
- The art of “Beeping” [*Donner, Microsoft Research*]
- Users may never have accessed the Internet at all or on a computer
- Users do not have credit cards

# Global Markets

Why Java ME?

# Lots of Technologies

- SMS
- MMS
- QR codes
- Mobile web sites
- IVR (Interactive Voice Response)
- Bluetooth
- Client applications
- Widgets
- USIM
- UDDI
- Mobile TV

...

# Java and Java ME – Some Numbers

- 3 billion mobile phones run Java
  - Feature phones, smart phones and Blackberry phones
- 5 billion Java Cards are in use
- 5 of the top 5 mobile phone manufacturers ship with Java
- 97% of enterprise desktops run Java
- 80 million TV devices run Java
- There are 9 million Java developers worldwide
- Java remains the #1 choice for developers

*Source: Blog of Janice Heiss*

Powerful

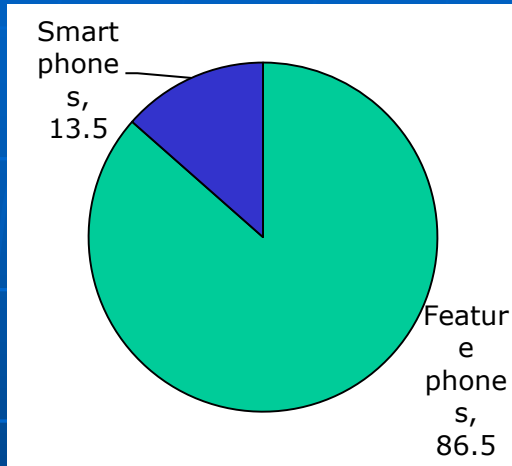

Java ME + SMS Technology

What are the devices?

# Devices

- A wide variety of feature devices by the main vendors
  - E.g., Nokia, Samsung, LG, Motorola, Sony Ericsson
- A wide variety of smartphones
  - E.g., Blackberry, Android phones, iPhone
- A wide variety of operating systems
  - E.g., Blackberry, Palm OS, Windows CE/Mobile, Symbian, Android
- A wide variety of development environments
  - E.g., Java ME, BREW, Google Android
- A wide variety of programming languages
  - Java, Python, Flash Lite, Objective C, C, C++, JavaScript, Qt, HTML and CSS for Widgets

# Global / US Handset Sales

Global (1Q 2009)

US (1Q 2009)

Blackberry  
First smartphone in  
North America  
Second smartphone  
globally

# Nokia New Handsets

- Nokia C1 [3<sup>rd</sup> Quarter 2010]
  - Standby battery time of up to six weeks
  - 2 SIM cards, only one active at a time
  - Flashlight
  - FM Radio
  - 500 phone number phonebook / 250 text messages
  - 30 euros
- Nokia C2 [4<sup>th</sup> Quarter 2010]
  - 2 SIM cards with dual standby capability
  - 1 hot-swappable SIM card
  - Micro-SD cards of up to 32GB
  - Access to Ovi Life Tools and Ovi mail
  - FM Radio
  - Music player
  - 45 euros

# China in the Handset Market

# Innovations in the African Context

## Yobalema

3G sim  
card

\$5  
(Senegal)

Senegal

Ghana

Nigeria

\$20

\$1.5 / day or \$30 / month for  
unlimited calls and Internet  
(Senegal)

\$100

\$1 / hour \$5 / day  
(Senegal)

What are the applications?

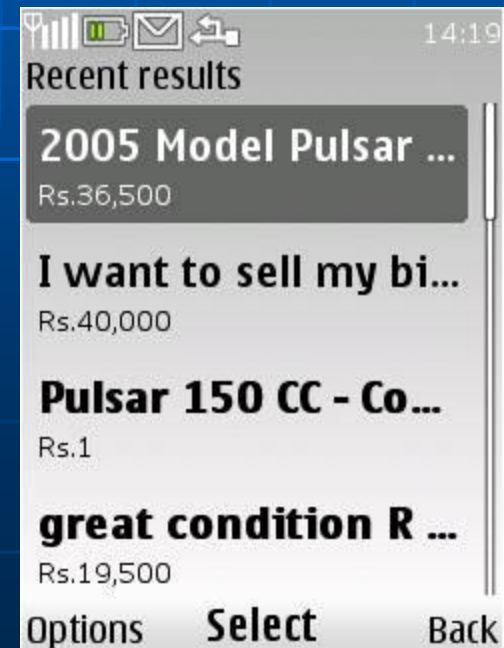

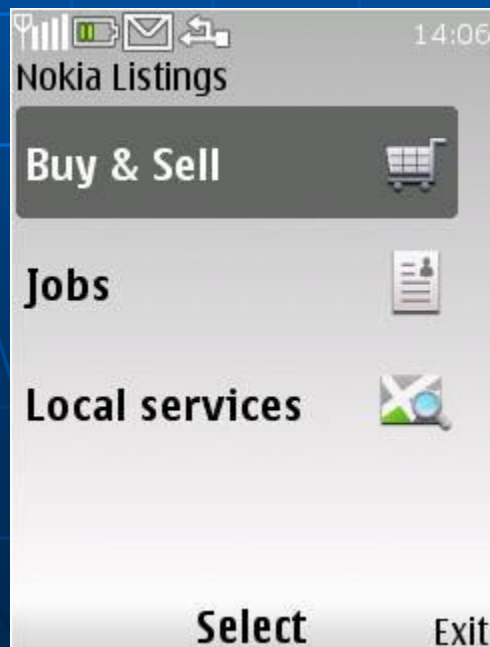

# Mobile Innovations

- Pioneering initiatives
  - mHealth
  - mFinance
  - mAgriculture
  - mCommerce
  - mGovernance
  - mActivism
  - mEducation
  - mIdentity
  - mEntertainment
  - ...

# Listings

- Listings is Nokia version of craigslist for the developing world
  - Works on basic mobile phones (Series 40) without GPRS connections
  - Geo-coded listings

*Republic Democratic of Congo*

How to distribute these  
applications?

# Mobile Stores

App Store	Android Market	Ovi Store	Blackberry App World
July 2008	March 2009	May 2009	November 2009

- GetJar, GooJet, Opera Widgets, Orange's Application shop, Vodaphone apps, T-mobile Applications, Sony Ericsson eStore...
- Free and paid apps
- Not all phones are supported
- Not open in all countries for developers and users
- Model not adapted to reach potential users in the developing world

# Who should develop these applications?

*Developers in the emerging and developing countries*

# Existing Programmes

- Pace University
  - MobileSenegal, 2007-
    - <http://www.mobilesenegal.com>
  - Global Software Development (GSD), 2005-
    - Collaboration between developers in the US and developing countries (India, Thailand, Cambodia, Senegal)
    - <http://atlantis.seidenberg.pace.edu/wiki/gsd2010>
- Mobile-empowered entrepreneurs in Africa, 2010
  - Web Foundation and Vodafone Group
  - Train entrepreneurs to leverage mobile and Web technologies relevant to developing countries
  - Creation of mobile training labs
  - Focus on Ghana
  - <http://www.webfoundation.org/projects/mobile-entrepreneurs/>

# Existing Programmes

- African Regional Mobile Application Labs, 2010
  - infoDev (World Bank) and Nokia
  - Increase the competitiveness of innovative companies working in mobile content and application
  - Focus on Kenya and South Africa
  - <http://www.infodev.org/en/Article.559.html>
- MIT courses “Designing Technologies for the Next Billion Mobile Users” and “Mobile Innovation for Global Challenges”, 2008-
  - Collaboration with NGOs
  - <http://nextlab.mit.edu/>
  - <http://tinyurl.com/39yxpuq>

# Existing Programmes

- EPROM (Entrepreneurial Programming and Research on Mobiles), 2006-
  - Focus on Kenya and Ethiopia
  - <http://www.media.mit.edu/ventures/EPROM/index.html>
- CodedInCountry, 2008-
  - Strengthen the capacity to develop software in low-income countries
  - “FairTrade” label for software projects
  - <http://groups.google.com/group/coded-in-country-launch>

# MobileSenegal

- Teach students the skills to engineer mobile solutions
- Educate students on the potential and procedures for creating tech startups (based on mobile technology)
- Develop mobile solutions for Senegal

**Mobile Phone  
Application Development  
and  
Web Design for Senegal**

<http://www.mobilesenegal.com>

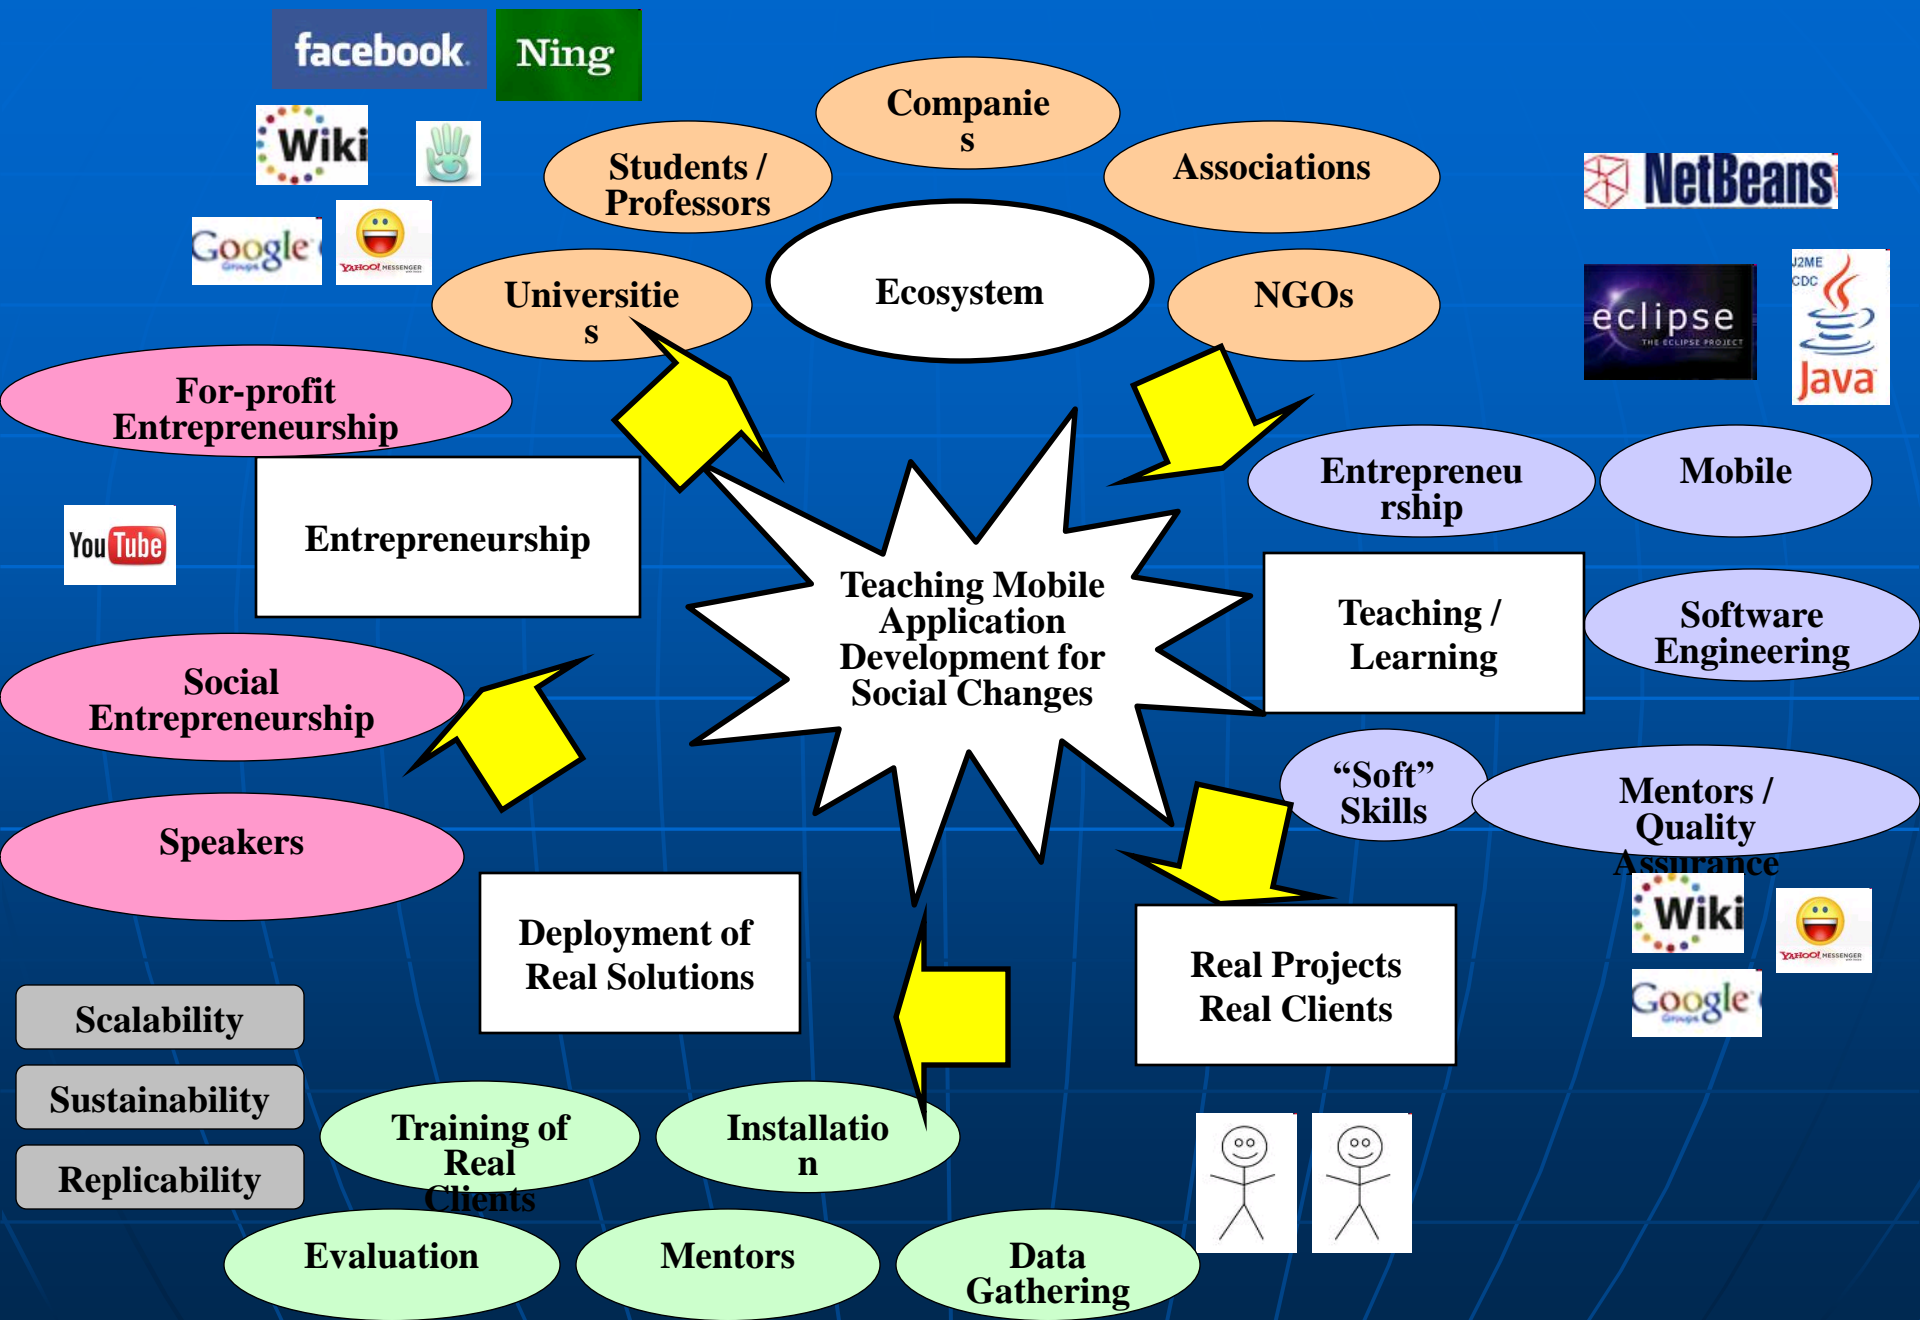

# MobileSenegal

- Boot camps in mobile application development at Thies
- Courses in mobile application development in different universities in Senegal
- National competition for the development of mobile applications
- Training for faculty
- Application for children, artisans and universities
  - KomKom – accounting for artisans – Nokia judge choice prize

Calling All Innovators.com

*Distributed  
Developers*

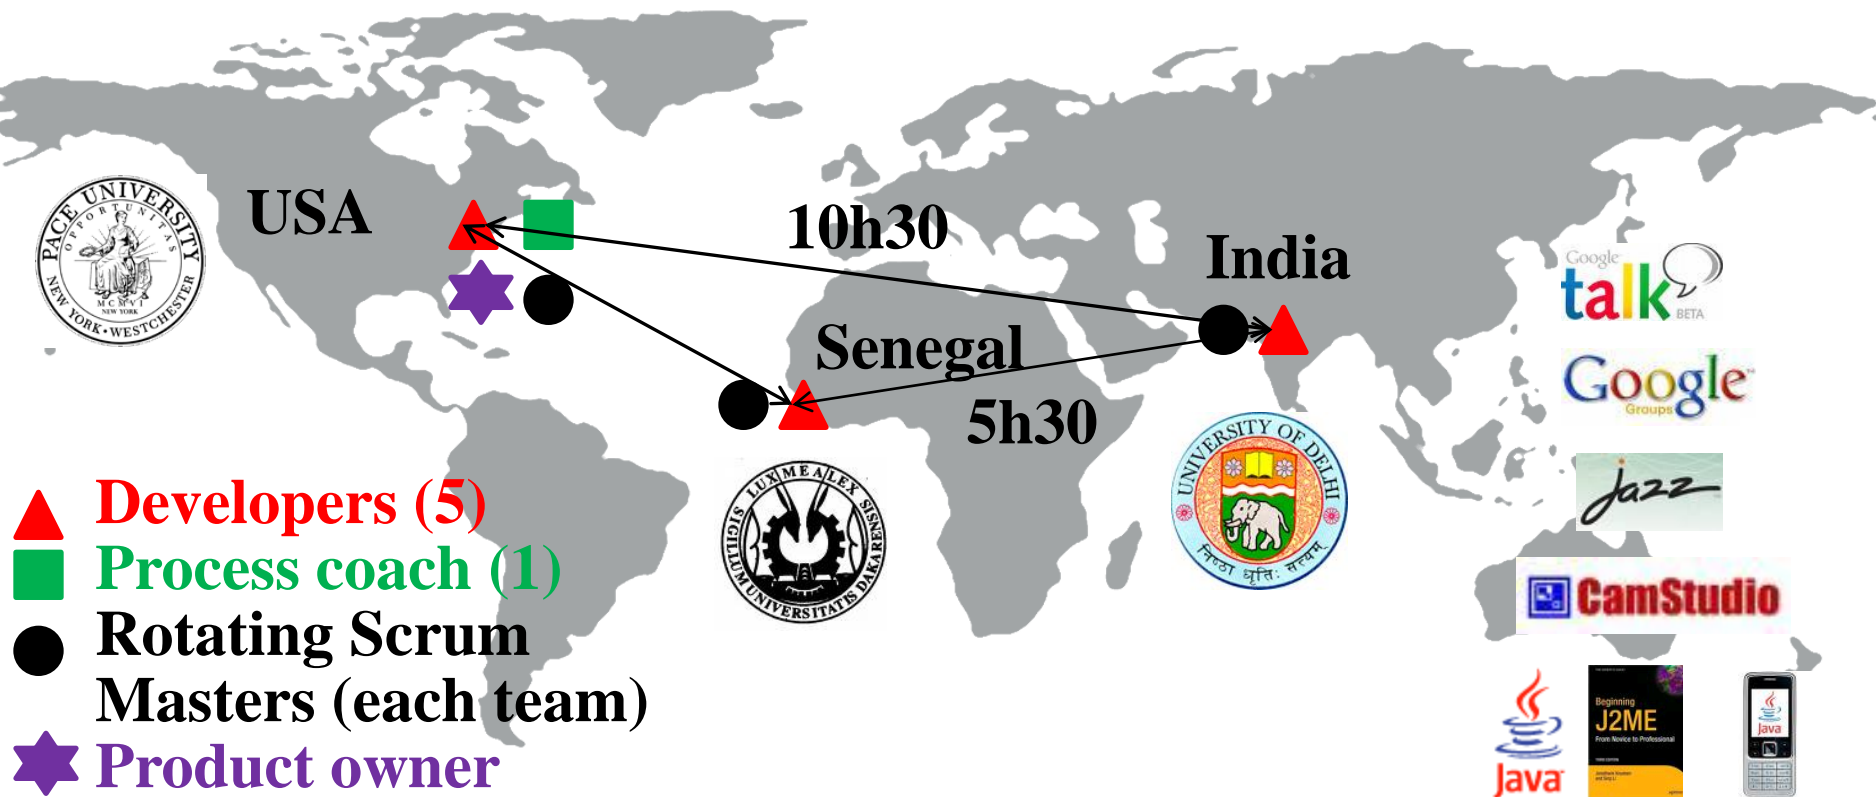

*End-to-Eng  
Tooling*

*Scrum*

*Mobile*

*Agile  
Methodologies*

# GSD 2009

# Software Development Project

- **TargetFirstGrade – Product owner: Dr. Scharff**
  - Mobile application to assess the learning of pupils in first grade (5-6 year old) in topics such as Mathematics, Reading, Writing and Geography
  - Delivery of exercises in these topics in the form of open-ended and multiple choice questions
  - Automated computation of the scores
  - SMS of the scores to the teachers and parents

Distributed  
developers

Quality

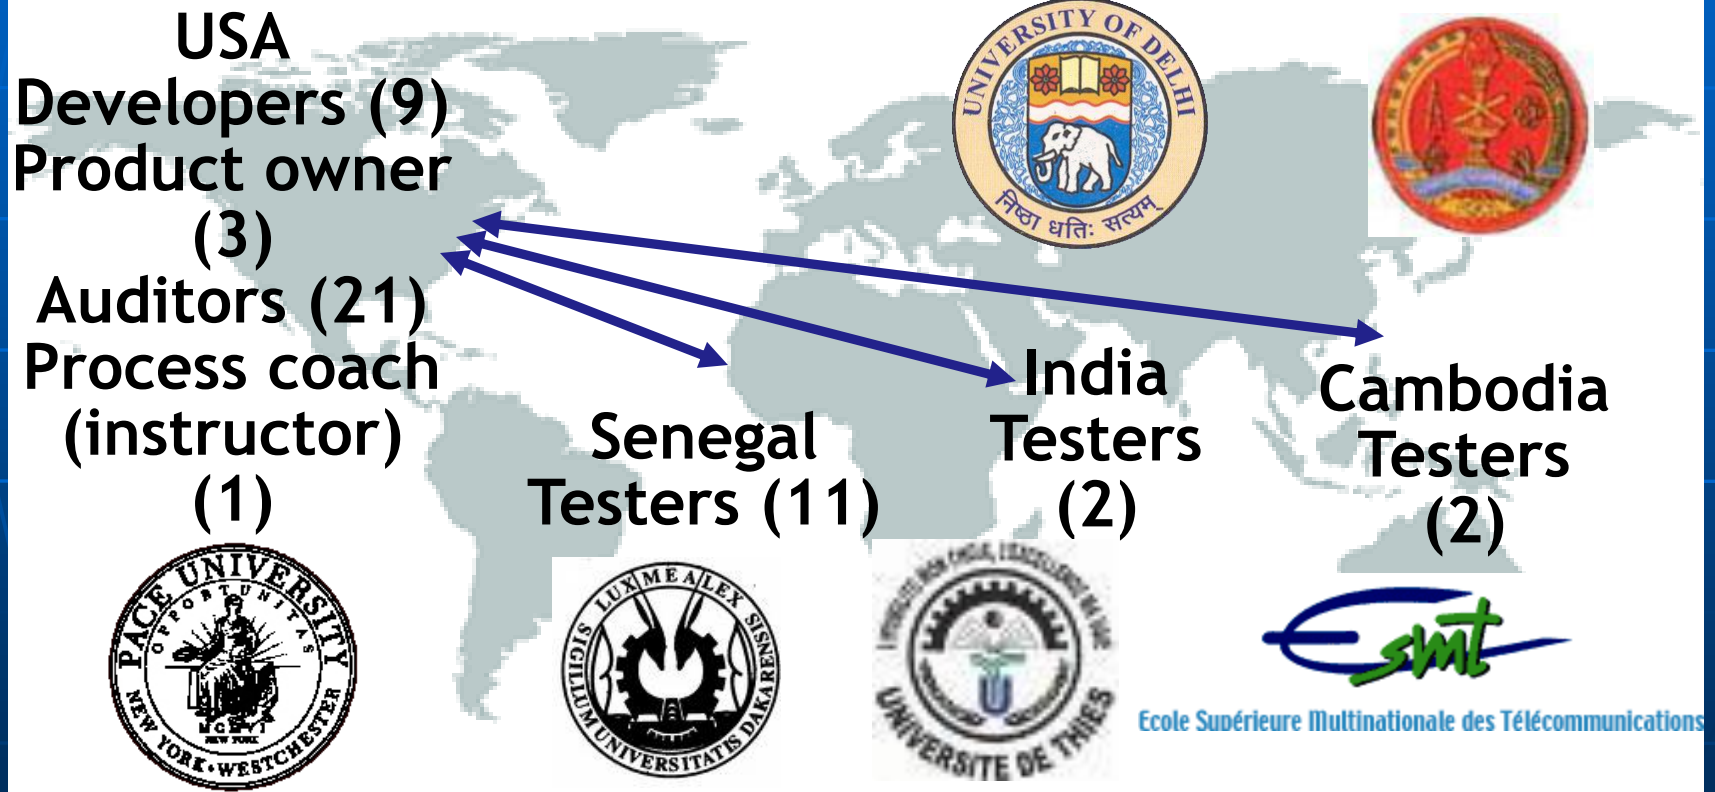

End-to-End  
Tooling

Scrum

Agile  
Methodologies

Mobile

# GSD 2010

Rational Team Concert

# Software Development Projects

- **Project1: No Ink** for Blackberry phones
  - Taking, annotating and organizing notes

- **Project 2: Back Pocket** for basic phones
  - Budgeting for students

- **Project 3: Godiva Flash Cards** for Android phones
  - Social flash cards to revise class topics

End-to-end tooling  
infrastructure

# Questions

- Who are the users? How are they using their phones?
- What devices are used?
- What applications are used?
- Are industries / developers seeking to understand these markets?
- Who will develop applications for these markets?
- How to train developers to target these markets?
- Is Java ME the dedicated technology for these markets?
- What are the specifics of developing mobile applications for these markets?
- What Java ME applications for these markets?
- What are the difficulties in developing / distributing / maintaining mobile applications for these markets?
